

# SYNC-ENDS (Team 66)

Varun Deepak Gudhe  
Sasank Marabattula  
Mathew Sills

## FINDING IT HARD TO KEEP UP WITH API CHANGES?

- Uninformed API changes can cause disruptions in project deployment, integration challenges, and a compromised user experience.
- Impossible for consumer to know every API change.

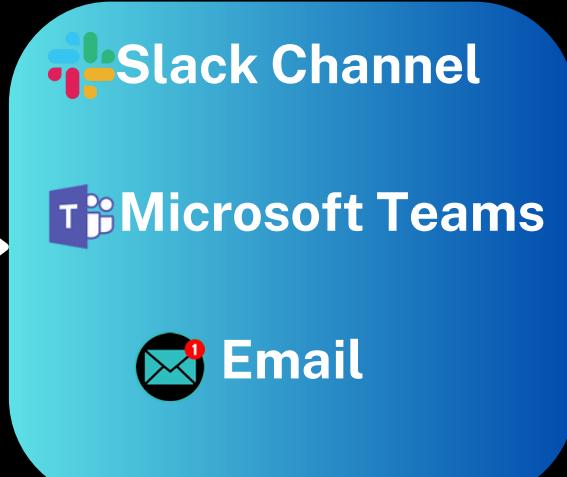

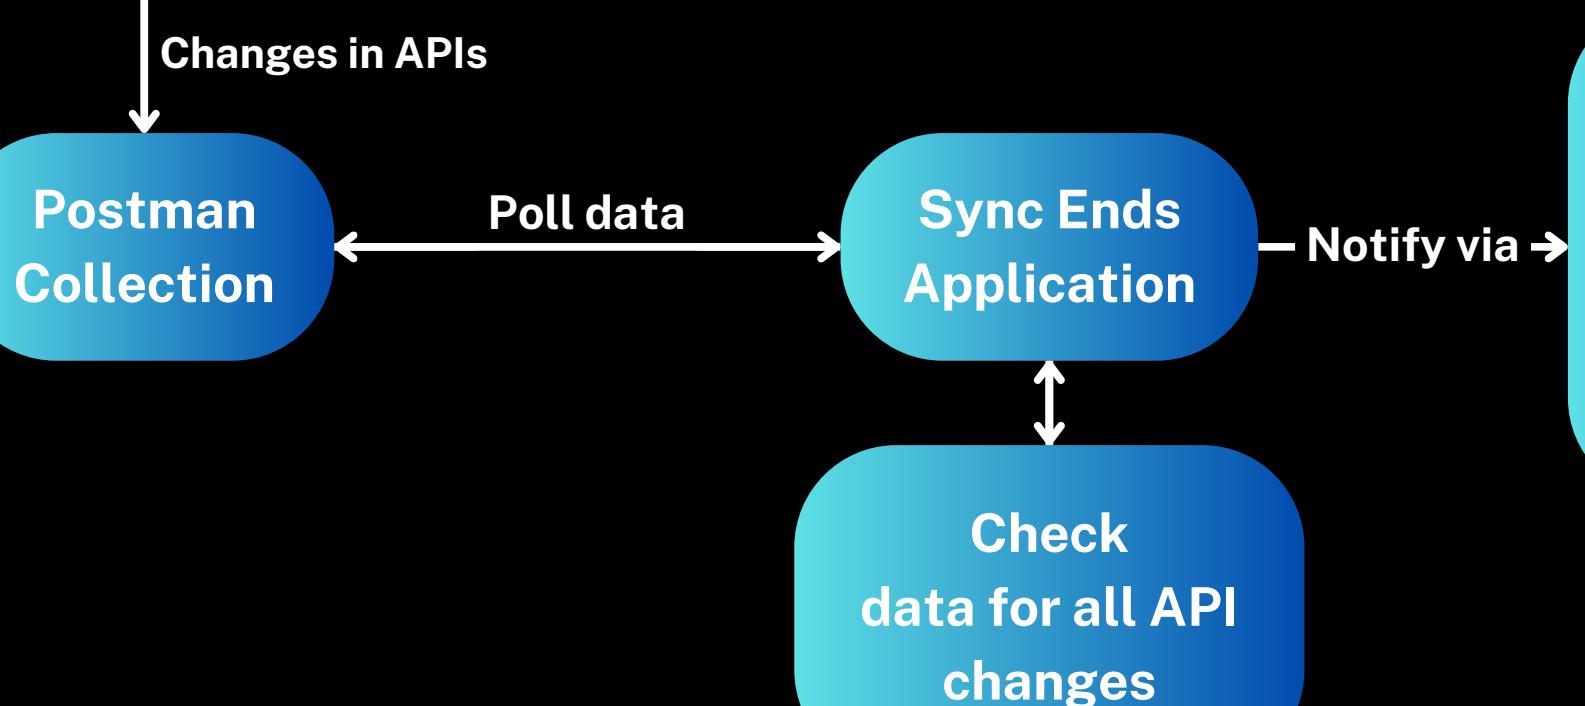

### EDUREKA! INTRODUCING "SYNC-ENDS"

- **Stay Informed:** Get real-time notifications of any API changes, ensuring you never miss an update.
- **Personalized Alerts:** Tailor your notifications to preferred platforms, be it Slack, Microsoft Teams, or Email. Choose what fits best for your team.
- **Error-Free Deployments:** With Sync-Ends, reduce the chances of deployment failures due to outdated APIs.

## WORKFLOW

SCAN ME

### POTENTIAL UPGRADES!

- Integrate with other API platforms like Swagger, Insomnia!
- Integrate with other messaging apps like Discord, Telegram!
- Make it Cloud Native using Docker or other cloud providers.
- Web dashboard for visual representation of API changes, trends over time, and more!
- Version control system for API changes, allowing users to view change history and even rollback!
- Custom alerts based on specific keywords or changes!
